Needs and Uses: The Restoring Internet Freedom Report and Order (Restoring Internet Freedom Order) revised the information collection requirements applicable to internet service providers (ISPs). The Open Internet Order, adopted in 2010, required ISPs to disclose certain network management processes, performance characteristics, and other attributes of broadband internet access service. These disclosure requirements were significantly increased by the Title II Order, adopted in 2015. The Restoring Internet Freedom Order eliminated the additional collection imposed by the Title II Order, and added a few discrete elements to the Open Internet Order's information collection requirements. The Restoring Internet Freedom Order requires an ISP to publicly disclose network management practices, performance, and commercial terms of

its broadband internet access service sufficient to enable consumers to make informed choices regarding the purchase and use of such services, and entrepreneurs and other small businesses to develop, market, and maintain internet offerings. As part of these disclosures, the rule requires ISPs to disclose their congestion management, application-specific behavior, device attachment rules, and security practices, as well as any blocking, throttling, affiliated prioritization, or paid prioritization in which they engage. The rule also requires ISPs to disclose performance characteristics, including a service description and the impact of nonbroadband internet access services data services. Finally, the rule requires ISPs to disclose the price of the service, privacy policies, and redress options. The rule requires ISPs to make such disclosures available either via a publicly-available, easily accessible website or through transmittal to the Commission, which will make such disclosures available via a publicly-available, easily accessible website. The information collection will assist the Commission in its statutory obligation to report to Congress on market entry barriers in the telecommunications market. The Commission anticipates that the revised disclosures would empower consumers and businesses with information about their broadband internet access service, protecting the openness of the internet. Although this collection was bifurcated in 2016 with respect to fixed and mobile ISPs, the Commission seeks to have this collection encompass both fixed and mobile ISPs.
